

Before.. Manual Process..

After.. AI-Enable (RPA) Process..

Using Microsoft's AI Builder, a PDF extraction RPA bot was created to facilitate automated creation of Purchase Invoice from a Supplier Invoice (PDF). An AI bot was trained all OPEX and CAPEX supplier PDFs to extract relevant header and line data i.e. Doc. Date, Inv. No., Line Desc., Quantity, Rate etc. The AI Bot was facilitated by API integration into ERP to auto create the Purchase Invoice with captured data from the bot.
